Membuat Form Login

- Pada folder **page** buat sebuah folder dengan nama **login** kemudian didalam folder **login** tersebut buat dua buah file dengan nama **submit_login.dart** dan **login_page.dart**

Copyright © September 2025

- Pada file **submit_login.dart** ketikkan kode berikut

```
1.  import 'package:flutter/material.dart';
2.
3.  class SubmitLogin extends StatelessWidget {
4.    const SubmitLogin({super.key});
5.
6.    @override
7.    Widget build(BuildContext context) {
8.      return Container(
9.        height: 60,
10.       width: MediaQuery.of(context).size.width - 2 * 24,
11.       child: ElevatedButton(
12.         onPressed: (){},
13.         child: Text(
14.           "Login",
15.           style: TextStyle(fontSize: 20, fontWeight: FontWeight.w500, color:
    Colors.white),
16.         ),
17.         style: ElevatedButton.styleFrom(
18.             backgroundColor: Colors.blue[900],
19.             shape: RoundedRectangleBorder(borderRadius: BorderRadius.circular(15))
20.         ),
21.       ),
22.     );
23.   }
24. }
```

- Kemudian pada file **login_page.dart** ketikkan kode berikut

```
1.  import 'package:flutter/material.dart';
2.  import './submit_login.dart';
3.
4.  class LoginPage extends StatefulWidget {
5.    const LoginPage({super.key});
6.
7.    @override
8.    State<LoginPage> createState() => _LoginPageState();
9.  }
10.
11. class _LoginPageState extends State<LoginPage> {
12.   @override
13.   Widget build(BuildContext context) {
14.     return Scaffold(
15.       appBar: AppBar(
16.         title: Text('Login', style: TextStyle(color: Colors.blueAccent, fontWeight:
    FontWeight.w500)),
17.         backgroundColor: Colors.transparent,
18.         centerTitle: true,
19.       ),
```

- Lanjutan Naskah

```
20.       body: SafeArea(
21.         bottom: false,
22.         child: ListView(
23.           padding: EdgeInsets.symmetric(horizontal: 12),
24.           children: [
25.             Image.asset('assets/img/login-logo.jpg', height: 300,fit: BoxFit.fill),
26.             TextField(decoration: InputDecoration(labelText: "Email", prefixIcon:
    Icon(Icons.email_outlined))),
27.             SizedBox(height: 15),
28.             TextField(
29.                 obscureText: true,
30.                 decoration: InputDecoration(
31.                     labelText: "Password",
32.                     prefixIcon: Icon(Icons.lock_clock_outlined)
33.                 )
34.             ),
35.             SizedBox(height: 15),
36.             SubmitLogin(),
37.           ],
38.         ),
39.       ),
40.     );
41.   }
42. }
```

Mengarahkan Tombol Login Menuju ke Halaman Login

- Buka file **tombol_login.dart** yang berada pada folder **pages/welcome** kemudian kita tambahkan beberapa kode sehingga menjadi seperti berikut.

- Pada kode disamping ada beberapa penambahan kode yaitu kita mengimport file **login_page.dart** (baris 2) dan menambahkan perintah pindah halaman menuju ke halaman login (baris 14)

```
1.  import 'package:flutter/material.dart';
2.  import '../login/login_page.dart';
3.
4.  class TombolLogin extends StatelessWidget {
5.    const TombolLogin({super.key});
6.
7.    @override
8.    Widget build(BuildContext context) {
9.      return Container(
10.       height: 60,
11.       width: MediaQuery.of(context).size.width - 2 * 24,
12.       child: ElevatedButton(
13.         onPressed: (){
14.           Navigator.push(context, MaterialPageRoute(builder:
    (context)=>LoginPage()));
15.         },
16.         child: Text(
17.           "Login",
18.           style: TextStyle(fontSize: 20, fontWeight: FontWeight.w500, color:
    Colors.blueAccent),
19.         ),
20.         style: ElevatedButton.styleFrom(
21.             backgroundColor: Colors.white,
22.             shape: RoundedRectangleBorder(
23.                 side: BorderSide(color: Colors.blueAccent, width: 3),
24.                 borderRadius: BorderRadius.circular(15)
25.             )
26.         ),
27.       ),
28.     );
29.   }
30. }
```

Copyright © September 2025

- Untuk hasilnya pada halaman welcome saat kita klik tombol Login, maka akan muncul halaman login seperti berikut
