Membuat Form Registrasi

- Pada folder **page** buat sebuah folder dengan nama **registrasi** kemudian didalam folder **registrasi** tersebut buat dua buah file dengan nama **submit_registrasi.dart** dan **registrasi_page.dart**

Copyright © September 2025

- Pada file **submit_registrasi.dart** ketikkan kode berikut

```
1.  import 'package:flutter/material.dart';
2.
3.  class SubmitRegistrasi extends StatelessWidget {
4.    const SubmitRegistrasi({super.key});
5.
6.    @override
7.    Widget build(BuildContext context) {
8.      return Container(
9.        height: 60,
10.       width: MediaQuery.of(context).size.width - 2 * 24,
11.       child: ElevatedButton(
12.         onPressed: (){},
13.         child: Text(
14.           "Daftar",
15.           style: TextStyle(fontSize: 20, fontWeight: FontWeight.w500, color:
    Colors.white),
16.         ),
17.         style: ElevatedButton.styleFrom(
18.             backgroundColor: Colors.green,
19.             shape: RoundedRectangleBorder(borderRadius: BorderRadius.circular(15))
20.         ),
21.       ),
22.     );
23.   }
24. }
```

- Kemudian pada file **registrasi_page.dart** ketikkan kode berikut

```
1.  import 'package:flutter/material.dart';
2.  import './submit_registrasi.dart';
3.
4.  class RegisterPage extends StatefulWidget {
5.    const RegisterPage({super.key});
6.
7.    @override
8.    State<RegisterPage> createState() => _RegisterPageState();
9.  }
10.
11. class _RegisterPageState extends State<RegisterPage> {
12.   @override
13.   Widget build(BuildContext context) {
14.     return Scaffold(
15.       appBar: AppBar(
16.         title:   Text('Registrasi',   style:   TextStyle(color:   Colors.blueAccent,
    fontWeight: FontWeight.w500)),
17.         backgroundColor: Colors.transparent,
18.         centerTitle: true,
19.       ),
```

- Lanjutan Naskah

```
20.       body: SafeArea(
21.         bottom: false,
22.         child: ListView(
23.           padding: EdgeInsets.symmetric(horizontal: 12),
24.           children: [
25.             Image.asset('assets/img/register-logo.jpg',       height:       300,fit:
    BoxFit.fill),
26.             TextField(decoration:    InputDecoration(labelText:    "Nama    Lengkap",
    prefixIcon: Icon(Icons.account_circle_outlined))),
27.             SizedBox(height: 15),
28.             TextField(decoration:  InputDecoration(labelText:  "Email",  prefixIcon:
    Icon(Icons.email_outlined))),
29.             SizedBox(height: 15),
30.             TextField(decoration:  InputDecoration(labelText:  "No.  Hp",  prefixIcon:
    Icon(Icons.phone))),
31.             SizedBox(height: 15),
32.             TextField(
33.                 obscureText: true,
34.                 decoration: InputDecoration(
35.                   labelText: "Password",
36.                   prefixIcon: Icon(Icons.lock_clock_outlined)
37.                 )
38.             ),
39.             SizedBox(height: 15),
40.             SubmitRegistrasi(),
41.             SizedBox(height: 15),
42.           ],
43.         ),
44.       ),
45.     );
46.   }
47. }
```

Mengarahkan Tombol Registrasi Menuju ke Halaman Registrasi

- Buka file **tombol_registrasi.dart** yang berada pada folder **pages/welcome** kemudian kita tambahkan beberapa kode sehingga menjadi seperti berikut

- Pada kode disamping ada beberapa penambahan kode yaitu kita mengimport file **registrasi_page.dart** (baris 2) dan menambahkan perintah pindah halaman menuju ke halaman register (baris 14)

```
1.  import 'package:flutter/material.dart';
2.  import '../registrasi/registrasi_page.dart';
3.
4.  class TombolRegistrasi extends StatelessWidget {
5.    const TombolRegistrasi({super.key});
6.
7.    @override
8.    Widget build(BuildContext context) {
9.      return Container(
10.       height: 60,
11.       width: MediaQuery.of(context).size.width - 2 * 24,
12.       child: ElevatedButton(
13.         onPressed: (){
14.           Navigator.push(context, MaterialPageRoute(builder:
    (context)=>RegisterPage()));
15.         },
16.         child: Text(
17.           "Registrasi",
18.           style: TextStyle(fontSize: 20, fontWeight: FontWeight.w500, color:
    Colors.white),
19.         ),
20.         style: ElevatedButton.styleFrom(
21.             backgroundColor: Colors.blue,
22.             shape: RoundedRectangleBorder(borderRadius: BorderRadius.circular(15))
23.         ),
24.       ),
25.     );
26.   }
27. }
```
