PERTEMUAN 9

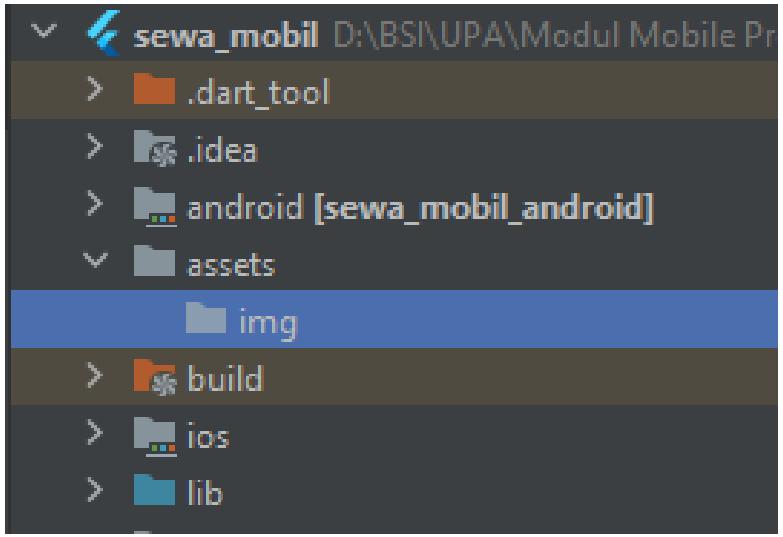
MOBILE Programming I

Copyright © September 2025

Membuat Projek Sewa Mobil

- Buat sebuah projek baru dengan nama **sewa_mobil**.

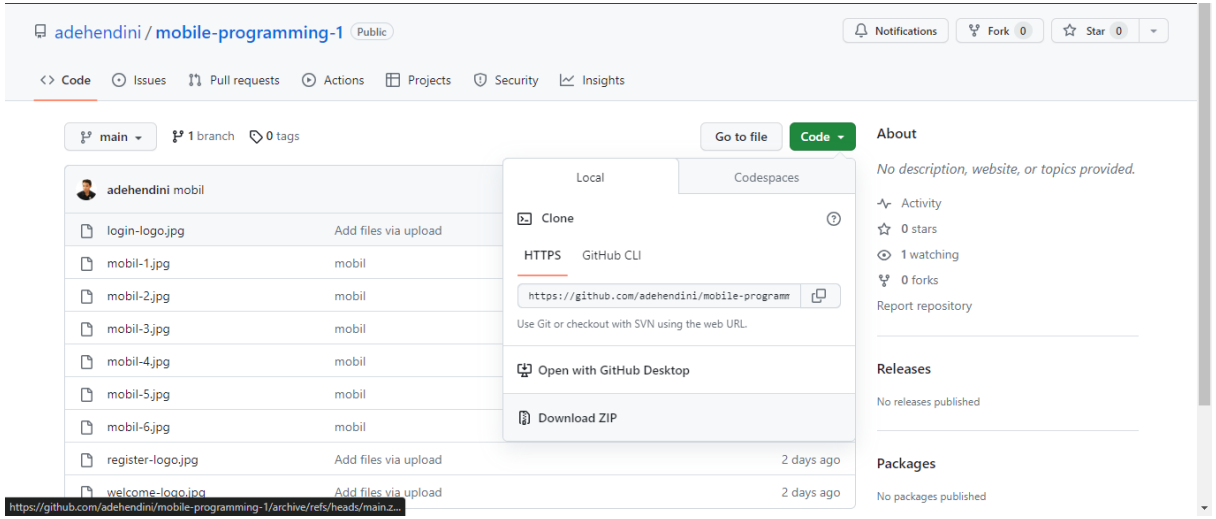
- Pada projek buat sebuah folder dengan nama **assets** kemudian didalam folder **assets** tersebut buat sebuah folder dengan nama **img**



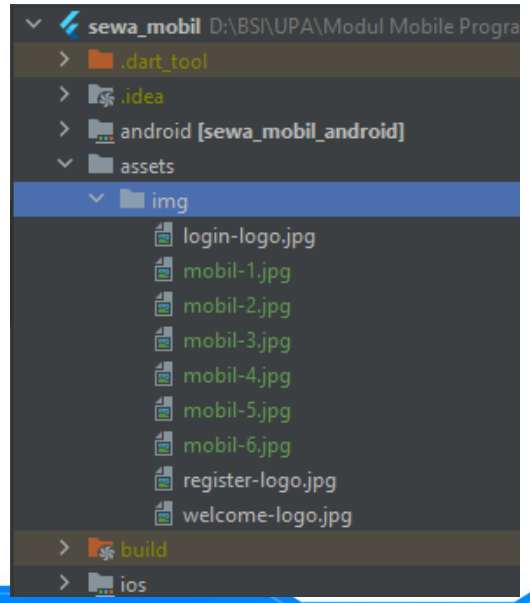
Copyright © September 2025

- Silahkan download gambar dari link berikut

  https://github.com/adehendini/mobile-programming-1



- Kemudian extrak hasil download (zip) dan copy gambar-gambar tersebut pada folder **assets/img** yang telah dibuat sebelumnya



Copyright © September 2025

- Pada projek buka file **pubspec.yaml** kemudian cari kode **flutter:** kemudian tambahkan assets seperti dibawah berikut

```yaml
# For information on the generic Dart part of this file, see the
# following page: https://dart.dev/tools/pub/pubspec

# The following section is specific to Flutter packages.
flutter:
  # The following line ensures that the Material Icons font is
  # included with your application, so that you can use the icons in
  # the material Icons class.
  uses-material-design: true
  assets:
    - assets/img/

  # To add assets to your application, add an assets section, like this:
  # assets:
  #   - images/a_dot_burr.jpeg
  #   - images/a_dot_ham.jpeg

  # An image asset can refer to one or more resolution-specific "variants"
```

- Mungkin akan berbeda letak baris kode tersebut jika menggunakan native code dengan melalui flutlab.io

Berikut jika menggunakan flutlab.io

```yaml
    sdk: flutter

dev_dependencies:
  flutter_test:
    sdk: flutter
  flutter_lints: ^2.0.2

flutter:
  uses-material-design: true
  assets:
    - assets/img/
```

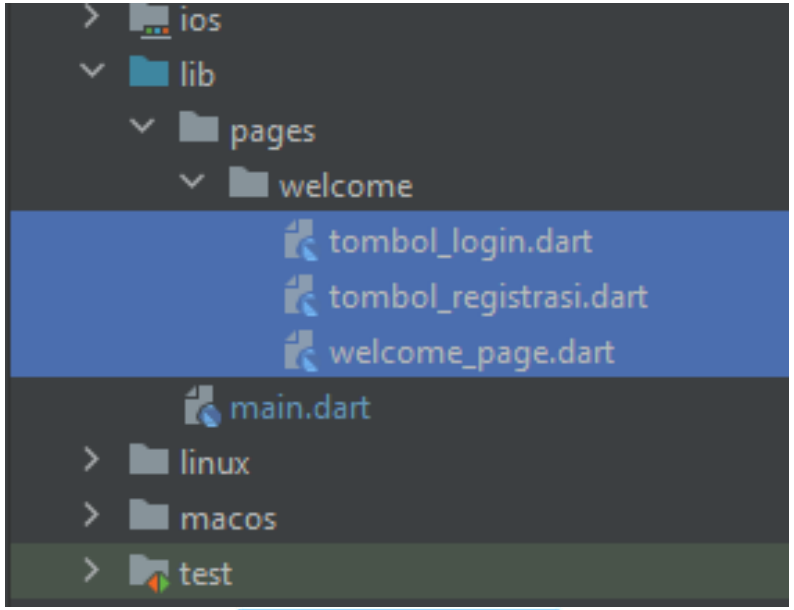
Membuat Halaman Welcome

- Pada projek, buat sebuah folder dengan nama **pages**, kemudian pada folder **pages** tersebut buat sebuah folder dengan nama **welcome** dan didalam folder welcome, buat tiga buah file dengan nama **tombol_registrasi.dart**, **tombol_login.dart** dan **welcome_page.dart**



Copyright © September 2025

- Pada file **tombol_registrasi.dart** ketikkan kode berikut

```
1.  import 'package:flutter/material.dart';
2.
3.  class TombolRegistrasi extends StatelessWidget {
4.    const TombolRegistrasi({super.key});
5.
6.    @override
7.    Widget build(BuildContext context) {
8.      return Container(
9.        height: 60,
10.       width: MediaQuery.of(context).size.width - 2 * 24,
11.       child: ElevatedButton(
12.         onPressed: (){},
13.         child: Text(
14.           "Registrasi",
15.           style: TextStyle(fontSize: 20, fontWeight: FontWeight.w500, color:
    Colors.white),
16.         ),
17.         style: ElevatedButton.styleFrom(
18.             backgroundColor: Colors.blue,
19.             shape: RoundedRectangleBorder(borderRadius: BorderRadius.circular(15))
20.         ),
21.       ),
22.     );
23.   }
24. }
```

Copyright © September 2025

- Pada file **tombol_login.dart** ketikkan kode berikut

```
1.  import 'package:flutter/material.dart';
2.
3.  class TombolLogin extends StatelessWidget {
4.    const TombolLogin({super.key});
5.
6.    @override
7.    Widget build(BuildContext context) {
8.      return Container(
9.        height: 60,
10.       width: MediaQuery.of(context).size.width - 2 * 24,
11.       child: ElevatedButton(
12.         onPressed: (){},
13.         child: Text(
14.           "Login",
15.           style:  TextStyle(fontSize:  20,  fontWeight:  FontWeight.w500,  color:
    Colors.blueAccent),
16.         ),
17.         style: ElevatedButton.styleFrom(
18.             backgroundColor: Colors.white,
19.             shape: RoundedRectangleBorder(
20.                 side: BorderSide(color: Colors.blueAccent, width: 3),
21.                 borderRadius: BorderRadius.circular(15)
22.             )
23.         ),
24.       ),
25.     );
26.   }
27. }
```

Copyright © September 2025

- Pada file **welcome_page.dart** ketikkan kode berikut

```dart
import 'package:flutter/material.dart';
import './tombol_registrasi.dart';
import './tombol_login.dart';

class WelcomePage extends StatelessWidget {
  const WelcomePage({super.key});

  @override
  Widget build(BuildContext context) {
    return Scaffold(
      body: SafeArea(
        bottom: false,
        child: ListView(
          padding: EdgeInsets.symmetric(horizontal: 12),
          children: [
            Image.asset('assets/img/welcome-logo.jpg',height: 300,fit: BoxFit.fill),
            SizedBox(height: 15),
            Text(
              "Selamat Datang",
              style:TextStyle(fontSize:36,color:Colors.blue,fontWeight: FontWeight.w500),
              textAlign: TextAlign.center,
            ),
            SizedBox(height: 15),
            Text(
              "Ini adalah aplikasi sewa mobil dimana kamu dapat menyewa berbagai macam mobil hanya dalam satu aplikasi",
              style:TextStyle(fontSize:20,color:Colors.black87,fontWeight: FontWeight.w500),
              textAlign: TextAlign.center,
            ),
            SizedBox(height: 51),
            TombolRegistrasi(),
            SizedBox(height: 15),
            TombolLogin()
          ],
        ),
      ),
    );
  }
}
```

Copyright © September 2025

- Kemudian pada file **main.dart** ubah kode menjadi

```
1.  import 'package:flutter/material.dart';
2.  import 'pages/welcome/welcome_page.dart';
3.
4.  void main() {
5.    runApp(const MyApp());
6.  }
7.
8.  class MyApp extends StatelessWidget {
9.    const MyApp({super.key});
10.
11.   @override
12.   Widget build(BuildContext context) {
13.     return MaterialApp(
14.       debugShowCheckedModeBanner: false,
15.       title: 'Penyewaan Mobil',
16.       home: WelcomePage()
17.     );
18.   }
19. }
```

Copyright © September 2025

- Dan hasilnya akan menjadi seperti gambar dibawah
